

## Registration Workflow

Front End → ReactJS

REST  
springboot

Database  
mysql

### Validations

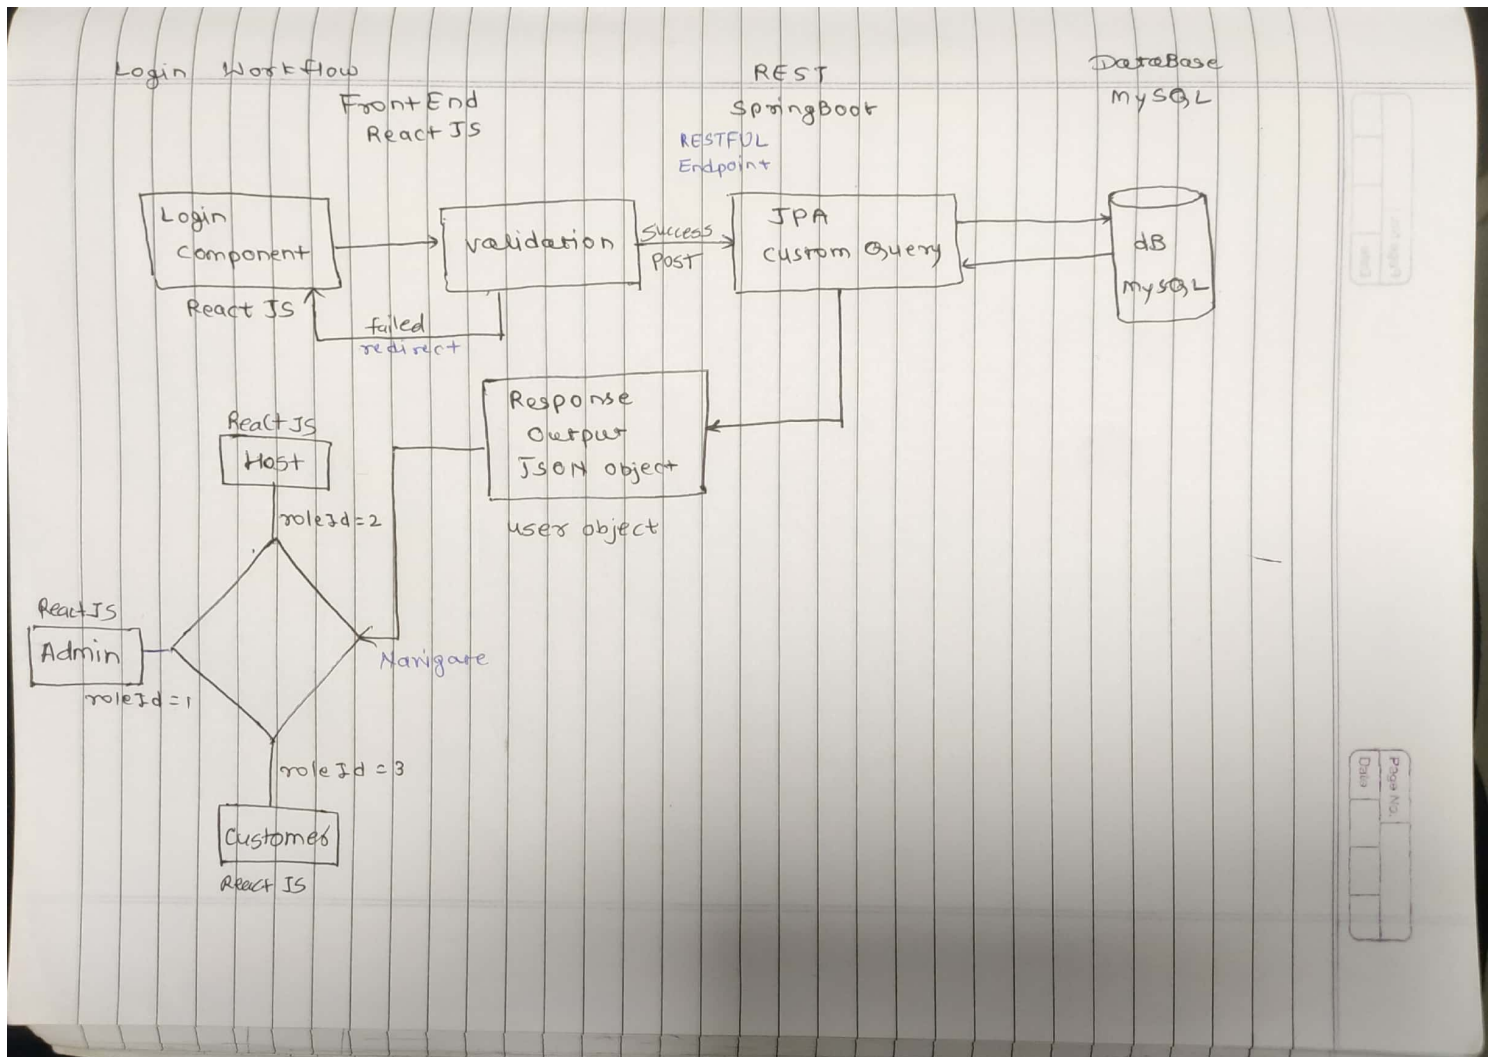

Client → Using RegEx

server side → using fetch()

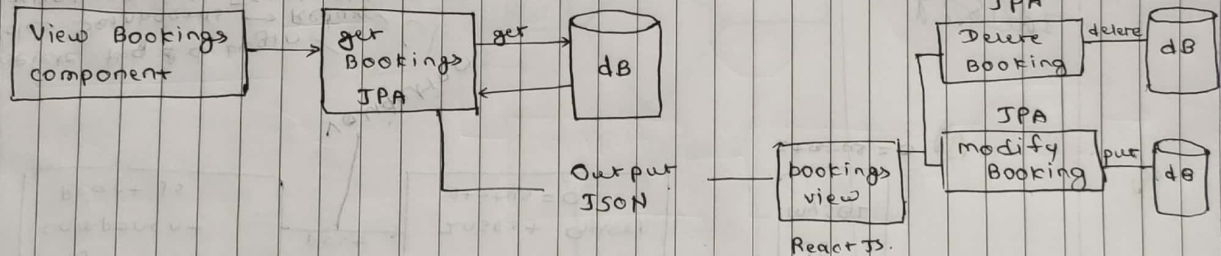

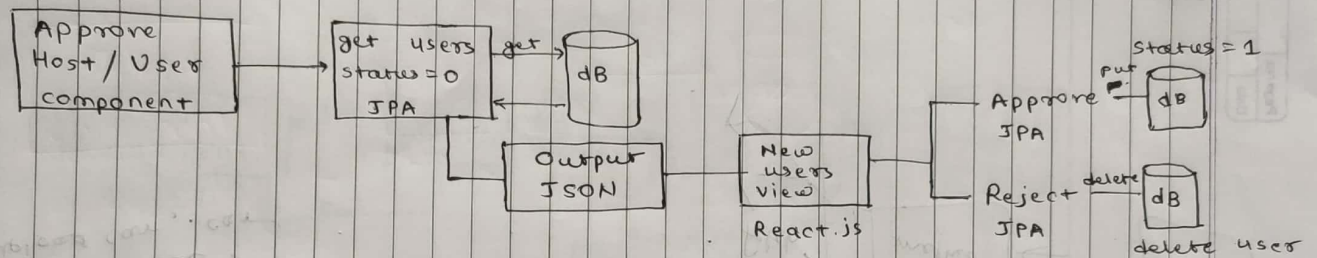

- get all customers/host
- & check that email id, contact, adharcard, pancard, upiid, license-no are not repeated

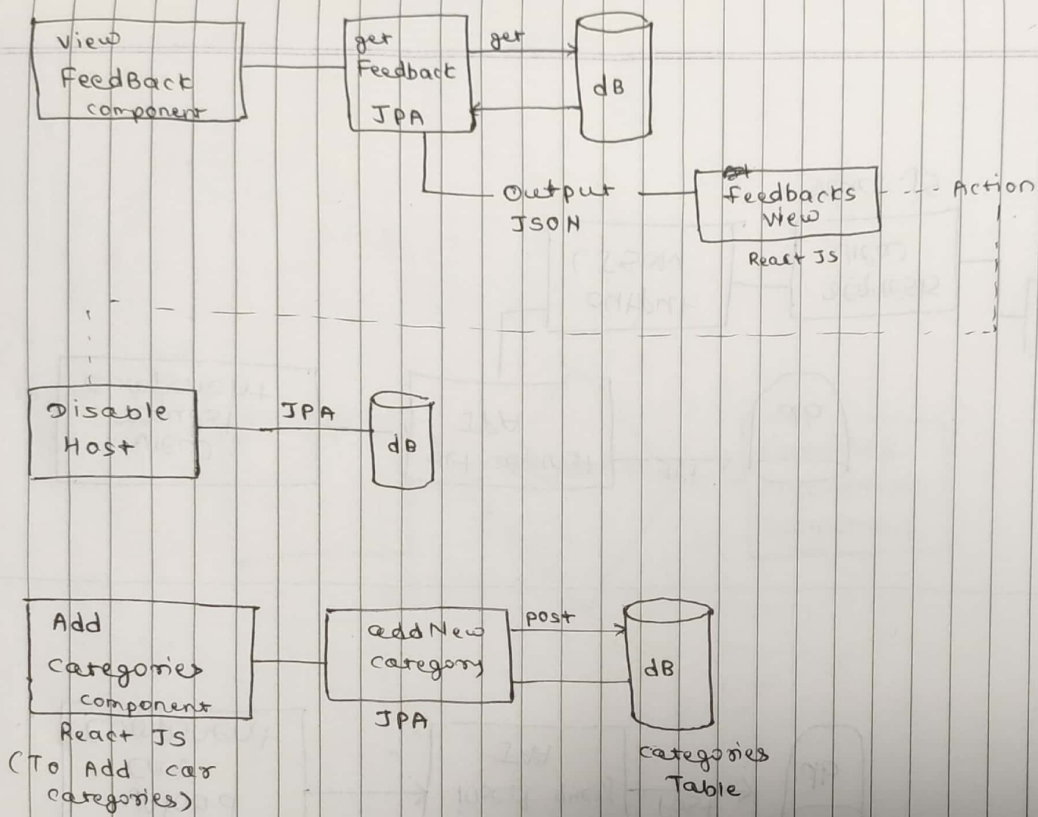

Clientside :

fname, lname →  $^{\wedge}[A-Z]\{1\}[a-z]$  → Names must start with capital letter.  
 contact, adharcard → ~~var~~ length must be 10 & 12  
 pancard →  $^{\wedge}[A-Z]\{5\}[0-9]\{4\}[A-Z]$
